

## **Conflict Minerals Report**

Knowles Corporation has included this Conflict Minerals Report as an exhibit to its Form SD for 2024 as provided for in Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and Form SD (collectively, the “Conflict Minerals Rule”). The date of filing of this Conflict Minerals Report is May 21, 2025. Information presented in this report is based on calendar years. Unless the context indicates otherwise, and except as noted below with respect to the Cornell Dubilier Acquired Business, the terms “we,” “its,” “us,” “our” and “Knowles” refer to Knowles Corporation and its consolidated subsidiaries. Consistent with the Conflict Minerals Rule, “Conflict Minerals” are defined as columbite-tantalite (coltan), cassiterite, gold, wolframite and their derivatives, which are limited to tantalum, tin, tungsten and gold (“3TG”) for purposes of this assessment, without regard to the location of origin of the minerals or derivative metals.

The scope of this Report is inclusive of all of Knowles’ applicable products, except those products related to Knowles’ acquisition of (i) all of the issued and outstanding shares of Kaplan Electronics, Inc. and (ii) certain assets of Cornell Dubilier Electronics, Inc. and CD Aero, LLC (collectively, the “Cornell Dubilier Acquired Business”), which Knowles acquired in November 2023. The Cornell Dubilier Acquired Business expanded our portfolio offering to include high-performance film, electrolytic, and mica capacitors used in medtech, defense, and industrial electrification applications. In accordance with the instructions of Form SD, Item 1.01(3), we are working with the suppliers of the Cornell Dubilier Acquired Business in order to report on those products commencing with the Form SD that will cover calendar year 2025 and be filed in 2026, which is following the end of the first reporting calendar year that begins no sooner than eight months after the effective date of our acquisition of the Cornell Dubilier Acquired Business.

Throughout this Conflict Minerals Report, whenever a reference is made to any document, third-party material, or website (including Knowles’ website), such reference is for general information only and does not incorporate information from such document, material or website into this Conflict Mineral Report, unless expressly incorporated by reference herein.

### ***Forward-Looking Statements***

This Conflict Minerals Report contains forward-looking statements within the meaning of the safe harbor provisions of the United States Private Securities Litigation Reform Act of 1995. The words “believe,” “expect,” “anticipate,” “continue,” “could,” “intend,” “may,” “plan,” “potential,” “seek,” “should,” “will,” “would,” “expect” and similar expressions, among others, generally identify forward-looking statements, which speak only as of the date the statements were made. The statements in this Conflict Minerals Report are based on current plans, expectations and assumptions and involve risks and uncertainties that could cause actual outcomes or results to differ materially from those outcomes or results that are anticipated or implied in these statements. These risks and uncertainties include, but are not limited to: the continued implementation of satisfactory traceability and other compliance measures by our direct and indirect suppliers on a timely basis or at all; whether smelters and refiners and other market participants responsibly source 3TG; political and regulatory developments, whether in the Democratic Republic of the Congo (the “DRC”), its adjoining countries, the United States or elsewhere; and other factors that we may not have currently identified or quantified. Knowles disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

### **Overview; Applicability of the Conflict Minerals Rule to Our Company**

Knowles is a leading manufacturer of specialty electronic components, including high performance capacitors, radio frequency (“RF”) and microwave filters, advanced medtech microphones, and balanced armature speakers, serving the medtech, defense, and industrial markets. During 2024, we also manufactured advanced micro-acoustic microphones for the communications and consumer electronics markets through our Consumer MEMS microphone business, until the sale of that business on December 27, 2024. We are subject to the Conflict Minerals Rule because certain of the products that we manufacture contain 3TG that are necessary to the functionality or production of the products. Not all of our products are in-scope under the Conflict Minerals Rule. Our in-scope products taken as a whole include all four 3TG.

We do not directly source 3TG from mines, smelters or refiners, and we believe that we are in most cases many levels removed from these market participants, which limits our influence over their sourcing. However, through the efforts described in this Conflict Minerals Report, we seek to ensure that our sourcing practices are consistent with the expectations provided in our Conflict Minerals Policy, which is described below.

For 2024, each of our in-scope products contained at least some 3TG content for which we were unable to determine the origin. Product, smelter and refiner information for 2024 is described under “Product Information” below and on Annex A. We have not

found for 2024 that any of the necessary 3TG contained in our in-scope products directly or indirectly financed or benefited armed groups in the DRC or an adjoining country. However, we could not conclude that any of our products were “DRC conflict free.” The terms “adjoining country,” “armed group” and “DRC conflict free” have the meanings contained in the Conflict Minerals Rule.

## **Our Conflict Minerals Policy**

We strongly disapprove of the violence in the DRC and adjoining countries and are committed to supporting responsible sourcing of 3TG. We also take seriously our compliance obligations under the Conflict Minerals Rule. To these ends, we have adopted and communicated to our suppliers and the public a company policy regarding 3TG (the “Conflict Minerals Policy”) for our supply chain.

As indicated in our Conflict Minerals Policy, as part of Knowles’s commitment to social responsibility and compliance with the Conflict Minerals Rule, it is our goal only to use 3TG in our products that does not directly or indirectly finance or benefit armed groups in the DRC or adjoining countries.

As also indicated in our Conflict Minerals Policy, Knowles expects our suppliers to:

- Adopt a conflict minerals policy that is consistent with our Conflict Minerals Policy and expect their direct and indirect suppliers to do the same.
- Exercise due diligence with relevant suppliers on the source and chain of custody of 3TG consistent with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition (the “OECD Guidance”).
- Identify smelters and refiners associated with the 3TG supply chain for our products.
- Transition to certified conflict free smelters and refiners.

We do not seek to embargo the sourcing of 3TG from the DRC region and encourage our suppliers to continue to source responsibly from Conformant (as defined on Annex A) smelters and refiners that source from the region.

## **Reasonable Country of Origin Inquiry Information**

As required by the Conflict Minerals Rule, for 2024, we conducted a “reasonable country of origin inquiry.” For our reasonable country of origin inquiry, to the extent applicable, we utilized the same processes and procedures as for our due diligence, in particular Steps 1 and 2 of the OECD Guidance framework, which are discussed below in this Conflict Minerals Report.

Our outreach included 110 direct suppliers (the “Suppliers”) that we identified as having provided us with components, parts or products that contain 3TG or that we believe may have provided us with components, parts or products that contain 3TG.

For 2024, the Suppliers identified to us 198 smelters and refiners as having processed the necessary 3TG contained in our in-scope products, as listed on Annex A. As indicated on Annex A, all of these smelters and refiners were listed as Conformant or Active (as defined on Annex A) by the Responsible Minerals Initiative (the “RMI”). According to information made available by the RMI to its members, all of these smelters and refiners sourced solely from outside of the DRC region, including from recycled or scrap sources.

Based on the results of our reasonable country of origin inquiry, we conducted due diligence for 2024. These due diligence efforts are discussed in this Conflict Minerals Report.

## **Due Diligence Program Design**

### *Design Framework*

We have designed our due diligence measures relating to 3TG to conform with, in all material respects, the criteria set forth in the OECD Guidance, including the related 3TG supplements.

### *Selected Elements of Design Framework*

The OECD Guidance has established a five-step framework for due diligence as a basis for responsible global supply chain management of minerals from conflict-affected and high-risk areas. Selected elements of our program design are discussed below. However, these are not all of the elements of the program that we have put in place to help ensure that the 3TG contained in our

products is responsibly sourced. The headings below conform to the headings used in the OECD Guidance for each of the five steps. Selected due diligence measures that we took in 2024 are discussed under “Due Diligence Program Execution.”

1. *Establish strong company management systems*

- a. We have a team of senior staff responsible for the management and continued implementation of our 3TG compliance strategy. The following functional areas are represented on the team or otherwise involved with our compliance process: financial reporting; internal audit; investor relations; legal; quality and supply chain. We also utilize outside counsel to assist us with our compliance efforts, as needed. The executive sponsor of the compliance program is our Senior Vice President – Chief Operating Officer.
- b. On an ongoing basis, selected internal personnel receive training on the Conflict Minerals Rule, the OECD Guidance, our compliance program and the procedures for reviewing and validating supplier responses to our inquiries. We have prepared written procedures addressing certain aspects of our compliance program, including our process for querying suppliers and reviewing supplier responses. These procedures have been communicated to the members of our internal working group.
- c. We have adopted a Conflict Minerals Policy. The Conflict Minerals Policy is posted on our website and selected employees and suppliers have been notified of the Conflict Minerals Policy. Our policy is available on our website at <https://www.knowles.com/about-knowles/legal/conflict-minerals>.
- d. We utilize the Conflict Minerals Reporting Template (the “Conflict Minerals Reporting Template”) developed by the RMI to identify smelters and refiners in our supply chain. The Conflict Minerals Reporting Template requests suppliers to provide information concerning the usage and source of 3TG in their products, as well as information concerning their related compliance efforts.
- e. We are a member of the RMI and of IPC International, Inc., a global trade association in the electronics industry and a leading source for industry standards. We actively participate on the RMI’s smelter engagement team.
- f. We maintain responses relating to 3TG due diligence, including records of due diligence processes, findings and resulting decisions, in an electronic format for at least five years.
- g. Our form of Supply Agreement and our forms of purchase order terms and conditions contain provisions relating to the sourcing of 3TG to be contained in our products.
- h. We have web-based and telephonic mechanisms available for employees, suppliers and other interested parties to report violations of our Conflict Minerals Policy. The contact information for our grievance mechanism is as follows: by telephone, 1-855-657-8022; and by web, [www.knowles.ethicspoint.com](http://www.knowles.ethicspoint.com). We communicate to stakeholders the availability of this mechanism for reporting violations of the Conflict Minerals Policy.

2. *Identify and assess risk in the supply chain*

- a. We request that suppliers provide us with information concerning the usage and source of 3TG in the parts that they sell to us and their related compliance efforts through the completion of a Conflict Minerals Reporting Template. We follow up by email or phone with suppliers that do not respond to the request within a specified time frame.
- b. We review the Conflict Minerals Reporting Templates that we receive from suppliers against internal written review criteria. We follow up by email or phone with suppliers that submit an incomplete response. We follow up with other suppliers where provided for under our review criteria or otherwise deemed appropriate by us.
- c. Smelter and refiner information provided by suppliers is reviewed against the Smelter Look-up tab of the Conflict Minerals Reporting Template. To the extent that a smelter or refiner identified by a supplier is not on that list, we take additional steps to attempt to determine whether the listed entity is a smelter or refiner.
- d. Smelter and refiner information is also reviewed against the lists of Conformant and Active smelters and refiners and country of origin information published by the RMI. To the extent that a smelter or refiner identified by a supplier is not listed as Conformant by the RMI, we consult publicly available information or information made available by the RMI to its members or request that the supplier contact the smelter or refiner to attempt to determine whether it obtained 3TG from sources that directly or indirectly financed or benefitted armed groups in the DRC or an adjoining country.

3. *Design and implement a strategy to respond to identified risks*

- a. We monitor and report on risk to designated senior management on an ongoing basis. Our 3TG compliance team reports the findings of its compliance efforts to our Vice President – Global Supply Chain.

- b. If a supplier identifies as part of our supply chain 3TG that originates from a non-Conformant smelter or refiner that sources from the DRC region, the supplier may be required to instead source from a Conformant smelter or refiner; the Conformant smelter or refiner may include the supplier's current smelter or refiner if it undergoes an independent third-party audit. As part of our risk management process, we request that the supplier reach out to the smelter or refiner in writing and/or telephonically encouraging it to participate in an independent third-party audit program. For other risks, our risk mitigation strategy allows for a flexible response that is commensurate with the risks identified.
  - c. In addition, to the extent that identified smelters and refiners are not Conformant, we seek to exercise leverage over these smelters and refiners to become Conformant through our participation in and support of the RMI. We also utilize information provided by the RMI to its members to monitor smelter and refiner improvement.
4. Carry out independent third-party audit of supply chain due diligence at identified points in the supply chain  
In connection with our due diligence, we utilize and rely on information made available by the RMI concerning independent third-party audits of smelters and refiners to assess smelter and refiner due diligence. We also support independent third-party audits by being a member of the RMI.
  5. Report on supply chain due diligence  
We file a Form SD, and to the extent applicable a Conflict Minerals Report, with the U.S. Securities and Exchange Commission and make these documents available on our website.

### **Due Diligence Program Execution**

We performed the following due diligence measures for the 2024 compliance period. These are not all of the measures that we took for that compliance period in furtherance of our Conflict Minerals Policy and 3TG compliance program or pursuant to the Conflict Minerals Rule and the OECD Guidance. For a discussion of the design of our due diligence measures, please see "Due Diligence Program Design."

1. We sent requests to 110 Suppliers to provide us with a completed Conflict Minerals Reporting Template. We followed up by email or phone with the Suppliers that did not provide a response within the specified time frame. We received Conflict Minerals Reporting Templates from 97% of the Suppliers to which we sent a request.
2. We reviewed the completed responses received from the Suppliers based on our internal written review criteria to identify incomplete responses and specified sourcing risks.
3. We reviewed the smelters and refiners identified to us by the Suppliers against those contained on the Smelter Look-up tab of the Conflict Minerals Reporting Template.
4. To the extent that a completed response identified a smelter or refiner, we also reviewed that information against the lists of Conformant and Active smelters and refiners and country of origin information published by the RMI. All of the identified smelters and refiners were listed as Conformant or Active by the RMI as of April 16, 2025.
5. To the extent that a smelter or refiner identified by a Supplier was not listed as Conformant by the RMI, we consulted publicly available information or information made available by the RMI to its members, or requested that the Supplier contact the smelter or refiner to attempt to determine whether that smelter or refiner obtained 3TG from sources that directly or indirectly financed or benefitted armed groups in the DRC or an adjoining country.
6. Our 3TG compliance team reported the findings of its compliance efforts regarding 2024 to our Vice President – Global Supply Chain.
7. In addition, to mitigate the risk that the necessary 3TG contained in our in-scope products directly or indirectly finance or benefit armed groups in the DRC or an adjoining country, we:
  - a. conducted training sessions for internal personnel involved with the review of Conflict Minerals Reporting Templates and the management of our compliance program generally; and
  - b. as part of our supplier audits, made inquiries concerning policies relating to 3TG sourcing.

### **Product Information**

For 2024, our in-scope product categories were: microphones, receivers, integrated modules, multi-functional devices, ultrasonic sensors, integrated audio sub-systems, transducers, oscillators, capacitors and filters. Not all of our products in these categories were

in-scope for purposes of our compliance. For a further discussion of our products, see our Annual Report on Form 10-K for the fiscal year ended December 31, 2024. The information contained in our Form 10-K is not incorporated by reference into this Conflict Minerals Report or our Form SD and should not be considered part of this Conflict Minerals Report or the Form SD.

Due to the challenges of tracing a multi-tier supply chain, for 2024, we were unable to determine the origin of at least a portion of the 3TG in each of our in-scope products. We have not found for 2024 that any of our in-scope products supported conflict (i.e., contained necessary 3TG that directly or indirectly financed or benefitted an armed group in the DRC or an adjoining country). An “armed group” under the Conflict Minerals Rule is an armed group that is identified as a perpetrator of serious human rights abuses in annual Country Reports on Human Rights Practices under sections 116(d) and 502B(b) of the Foreign Assistance Act of 1961 relating to the DRC or an adjoining country. However, we did not conclude that any of our products were “DRC conflict free.”

### **Identified Smelters and Refiners**

In connection with our reasonable country of origin inquiry or due diligence, as applicable, the Suppliers identified to us the facilities listed on Annex A as having processed the necessary 3TG contained in our in-scope products in 2024. Due to our position in the supply chain, which is discussed earlier in this Conflict Minerals Report, we rely on our suppliers for accurate smelter and refiner information and our due diligence measures do not provide absolute certainty regarding the source and chain of custody of the necessary 3TG contained in our in-scope products.

We endeavored to determine the mine or location of origin of the 3TG contained in our in-scope products by requesting that the Suppliers provide us with a completed Conflict Minerals Reporting Template. Where a smelter or refiner was identified, we also reviewed publicly available information and information made available by the RMI to its members, to the extent available, to try to determine the mine or location of origin.

### **Future Risk Mitigation Efforts**

We continue to take the following additional steps to enhance our 3TG compliance program and to mitigate the risk that the necessary 3TG in our in-scope products benefits armed groups:

1. Conduct training sessions for selected suppliers and for internal personnel involved with the review of Conflict Minerals Reporting Templates and the management of our compliance program generally, and otherwise institute measures to help ensure that relevant personnel at our larger suppliers undergo sufficient training.
2. As part of our supplier audits, make inquiries concerning policies relating to 3TG sourcing.
3. Reach out to suppliers suspected of embargoing sourcing of 3TG from the DRC region.
4. Continue to actively participate in the RMI.
5. Through our participation in RMI committees, encourage non-Conformant smelters and refiners to undergo certification.
6. Continue to utilize a robust information technology solution for the management of data relating to our 3TG compliance program.
7. Continue to encourage Suppliers that provided company-level information for 2024 to provide product-level information for 2025 through ongoing outreach with these Suppliers.
8. Engage with Suppliers that provided incomplete responses for 2024 to help ensure that they provide requested information for 2025.
9. Monitor and encourage the continuing development and progress of traceability measures at Suppliers that indicated for 2024 that the source of 3TG was unknown or undeterminable.
10. Communicate to new potentially in-scope suppliers our sourcing expectations, including through the dissemination of our Conflict Minerals Policy to them. In addition, as new in-scope suppliers are added, work with these suppliers to help ensure that they understand the requirements of the Conflict Minerals Rule and the OECD Guidance.

To the extent applicable, we also intend to continue to take, in respect of our 2025 compliance, the 2024 compliance steps discussed earlier in this Conflict Minerals Report.

## Annex A

Capitalized terms used and not otherwise defined in this Annex have the meanings set forth in the Conflict Minerals Report of which this Annex is a part.

### Smelters and Refiners

In connection with our reasonable country of origin inquiry or due diligence, as applicable, the Suppliers identified to us the smelters and refiners listed below as having processed the necessary 3TG contained in our in-scope products in 2024. Please see the notes that accompany the table for additional information concerning the information in the table.

(1) We note the following in connection with the information contained in the foregoing table:

- (a) The smelters and refiners listed in the table were identified by the Suppliers to us as being part of our 2024 supply chain. Not all of the included smelters and refiners may have processed the necessary 3TG contained in our in-scope products due to over-inclusiveness in the information the Suppliers provided to us and/or received from their suppliers. In addition, the smelters and refiners listed above may not be all of the smelters and refiners in our supply chain, since many Suppliers were unable to identify all of the smelters and refiners used to process the necessary 3TG content contained in our in-scope products and because not all Suppliers responded to our inquiries.
- (b) The table only includes entities that were listed on the Smelter Look-up tab of the Conflict Minerals Reporting Template.
- (c) Smelter or refiner status information in the table is as of April 16, 2025

- (d) “Conformant” means that a smelter or refiner is listed as conformant with the Responsible Minerals Assurance Process’s (“RMAP”) assessment protocols, including those classified as “Re-audit in progress” by the RMAP. Included smelters and refiners were not necessarily Conformant for all or part of 2024 and may not continue to be Conformant for any future period. We do not have information on the origin of the 3TG processed by any of the Conformant smelters and refiners prior to their respective certification dates.
- (e) “Active” is an RMAP designation that means that the smelter or refiner has committed to undergo an RMAP assessment. Smelters and refiners are listed as Active in the RMAP once they have scheduled the assessment date.
- (f) “Country of Location” refers to the country in which the applicable smelter or refiner is located.
- (g) Smelter or refiner status and smelter or refiner location reflected in the table is based solely on information made publicly available by the RMI, without independent verification by us.

## Country of Origin Information

The countries of origin of the 3TG processed by the Conformant smelters and refiners listed above may have included the countries listed below, as well as additional countries. The listed countries of origin are derived from information made available by the RMI to its members. Except for the DRC, the RMI does not indicate individual countries of origin of the 3TG processed by Conformant smelters and refiners. Instead, the RMI indicates country of origin by risk category: Low Risk, High Risk, CC and DRC. The categories are based on sourcing risk as indicated below:

Low Risk – Countries that are not identified as conflict regions or plausible areas of smuggling or export from the DRC and its nine adjoining countries: Argentina, Armenia, Australia, Austria, Azerbaijan, Benin, Bolivia, Brazil, Burkina Faso, Canada, Chile, China, Colombia, , Dominican Republic, Ecuador, Egypt, Eritrea, Ethiopia, Finland, France, Georgia, Germany, Ghana, Guatemala, Guinea, Guyana, Honduras, India, Indonesia, Italy, Ivory Coast, Kazakhstan, Kyrgyzstan, Laos, Madagascar, Malaysia, Mali, Mauritania, Mexico, Mongolia, Morocco, Myanmar, Namibia, Nicaragua, Niger, Nigeria, Papua New Guinea, Peru, Philippines, Poland, Portugal, Russian Federation, Saudi Arabia, Senegal, Sierra Leone, Singapore, Slovakia, Solomon Islands, Spain, Suriname, Swaziland, Sweden, Switzerland, Taiwan, Thailand, Turkey, Togo, United Kingdom, United States of America, Uruguay, Uzbekistan, Venezuela, Vietnam and Zimbabwe.

High Risk – Countries that are known or plausible countries for smuggling, export out of region or transit of materials containing 3TG: Kenya, Mozambique and South Africa.

CC – The countries covered under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, being the DRC and its nine adjoining countries: Angola, Burundi, Central African Republic, Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda and Zambia.

DRC – The Democratic Republic of the Congo.

In addition, some of the 3TG processed by the Conformant smelters and refiners originated in whole or in part from recycled or scrap sources.

Because the RMI generally does not indicate individual countries of origin of the 3TG processed by Conformant smelters and refiners, we were not able to determine the countries of origin of the 3TG processed by the listed Conformant smelters and refiners with greater specificity. In addition, for some of the listed Conformant smelters and refiners, origin information is not disclosed by the RMI. We did not determine the countries of origin of the 3TG processed by other smelters and refiners listed on this Annex A.
