TrillBit

Voice is the future

We make it secure

We make it simple

ABOUT US

Trillbit makes it easy to set up and authenticate transactions on Smart Devices using its "Data over sound" technology.

Trillbit unlocks a multibillion-dollar market opportunity for voice transactions by making them even more secure than traditional online transactions.

OUR CORE SERVICES

Passwordless authentication

3x faster login experience

Over **80%** of breaches happen due to weak passwords.

Trillbit introduces "Data over sound" technology that eliminates the need of passwords which makes the whole process simple and secure.

IoT device Setup and Security

5x faster device setup

The initial setup and configuration of Smart Devices remain difficult and often frustrating. Due to this, **7%** of the IoT devices are returned.

Trillbit makes it easy to setup smart/IoT devices seamlessly without the need of any hardware integration.
