

Subject: Updated Requirements for Sending Controlled Unclassified Information (CUI)

To ensure continued compliance with **DFARS 252.204-7012**, Knowles has transitioned to a secure GCC High environment for handling Controlled Unclassified Information (CUI).

Effective immediately, all CUI and technical data must be transmitted solely through the **knowlesgcc.us** domain. Transmission of CUI to commercial **knowles.com** addresses is strictly prohibited and may result in blocked delivery to ensure regulatory compliance.

Day-to-day, non-CUI communication should continue through existing commercial channels. Please direct any questions regarding these new procedures to your established Knowles point of contact.

Content Type	Send To
Controlled Unclassified Information (CUI)	[Name]@knowlesgcc.us
General Communication	[Name]@knowles.com

If you have any questions, reach out to your Knowles point of contact for guidance before transmitting.

Thank you for your cooperation and continued partnership in maintaining secure and compliant communication.
